WHAT IS TELEMENTAL HEALTHCARE?

Telemental health is a subset of telehealth services that uses online, interactive videoconference software to provide mental health services from a distance. Telemental health includes terms such as telepsychology, telebehavioral health, online counseling, and distance counseling. Private insurance companies in CT and many other states are required by law to cover telemental health services. Telehealth does not include the use of fax, audio-only telephone, e-mail, or videotelephony products such as FaceTime and Skype.

SOME POTENTIAL RISKS OF TELEMENTAL HEALTH

- Technological failures such as unclear video, loss of sound, poor internet connection, or loss of internet connection
- Nonverbal cues might be more difficult to observe and interpret during therapist and client interactions
- Must electronically share and sign practice and consent forms and accept risks that come with transmitting information and documents over the internet

BENEFITS OF TELEMENTAL HEALTH

- Less limited by geographical location and transportation concerns
- Decrease in travel time and ability to meet virtually during inclement weather conditions
- Ability to participate in treatment from your own home or other environment where you feel safe, secure, and comfortable
